

Danilo Alessandro Vinciprova

AI-Assisted Web Developer · React · Next.js · Claude Code

Open to full-time and contract roles · London, remote or relocation · Available immediately

London, UK · Full right to work in the UK and the EU

danilo.vinciprova.dev@gmail.com · <https://github.com/zurukzuruk1> · <https://www.freecodecamp.org/danilovinciprova> · <https://danilovinciprova.com/>

PROFILE

I build things people can open, use and check for themselves. This CV works the same way: every project shows the evidence behind it.

PROJECTS

I build with AI coding agents such as Claude Code: I set the requirements and the design, direct the work and check every result.

London Move Build — Live · Next.js · Tailwind CSS · live website

Real-world website I built for my father's carpentry and building work. Live, and the photos show real work.

<https://londonmovebuild.com>

Evidence: Live site · screenshots at 3 widths · Lighthouse + axe, 29 Sep 2026

Signal Ads Lab — Live · Website for a short-form video ads service

Website for Signal Ads Lab, my short-form video ads service. The site is live at signaladslab.com.

<https://signaladslab.com>

Evidence: Live site · screenshots at 3 widths · 2 code excerpts from index.html · Lighthouse + axe, 5 Oct 2026

CURATA — Prototype · Next.js, Tailwind CSS, Framer Motion

A prototype boutique of Amazon UK finds, curated by the character Cura. It is a prototype, not a live shop.

Evidence: Screen recording · screenshots at 2 widths · 2 code excerpts from page.tsx

LocalVision Studio — Prototype · Next.js, Tailwind CSS, Framer Motion

A prototype website offering websites and AI videos to local businesses, built around an interactive “business upgrade simulator”. A prototype, not client work.

Evidence: Screen recording · screenshots at 2 widths · 2 code excerpts from Simulator.tsx

Streetlight Studios — Concept · landing page · HTML, CSS, JavaScript

A concept landing page for cinema-grade video ads. A concept, not client work.

Evidence: Screen recording · screenshots at 2 widths · 7 code excerpts from mockup-cinema-ads.html

TAGLIO Soho — Concept · Fictional business · HTML and CSS

A concept website for a fictional Roman pizza al taglio shop in Soho, London. TAGLIO is not a real pizzeria; this is a concept, not client work.

Evidence: Screenshots at 3 widths · 2 code excerpts from index.html

FWEA — AI agent workflow — Release candidate · Claude Code · multi-agent design, review and verification

Release candidate: Built and reviewed; final A/B validation not yet completed

A multi-agent AI workflow I designed and directed with Claude Code: it builds and tests a reusable web-design skill (builder, reviewer, fixer and verifier agents; checkpoints and SHA-256 hashes). The first version of this CV was built with it.

Multi-agent system designed and orchestrated by me.

Evidence: 6 excerpts of the FWEA review log · FWEA checkpoint record

AI video concepts — Concept · Virtual model · cinematic scene · animated short

A consistent virtual fashion model, a cinematic fantasy scene and an animated short, made with AI video tools. Concept work, not client work.

Evidence: AI video concepts (3 short videos)

HOW I WORK

I use AI agents as part of a structured development workflow: build → review → fix → verify, while keeping responsibility for requirements, decisions and final quality.

EXPERIENCE

Self-directed study · Web development and AI tools · London · 2025 – present

Delivery driver · Uber, Gopuff · London · 2019 – 2025

Dog walker and pet sitter · Private households · London · 2019

Kitchen porter · Regency, Blackfriars office · London · 2018

SKILLS

✓ = proven by a certificate or public code

✓ HTML, CSS and responsive web design

✓ JavaScript

<https://github.com/zurukzuruk1/back-end-development-and-apis>

✓ Front-end development libraries

✓ Node.js and APIs (back-end fundamentals)

<https://github.com/zurukzuruk1/back-end-development-and-apis>

✓ SQL, PostgreSQL and Bash

<https://github.com/zurukzuruk1/celestial-bodies-database>

<https://github.com/zurukzuruk1/salon-appointment-scheduler>

✓ Python fundamentals

✓ Git and GitHub

<https://github.com/zurukzuruk1>

Next.js and Tailwind CSS, used to build the London Move Build website

<https://londonmovebuild.com>

✓ React

<https://raw.githubusercontent.com/freeCodeCamp/freeCodeCamp/main/curriculum/structure/superblocks/front-end-development-libraries-v9.json>

AI-assisted development with Claude Code; multi-agent workflows with builder, reviewer, fixer and verifier roles; designing and testing Claude Code skills

Designed ILF, a personal framework of structured AI “labs” for web design, film, food and product work

CERTIFICATIONS

6 freeCodeCamp certifications — all exam-based

Relational Database — 27 Sep 2026
